

Construction Chemicals

With our products and services that address the raw material needs of producers of concrete, plaster, cement, paint, ceramic, glass and insulating materials, we are also growing in the category of construction chemicals in parallel with the increasing speed of urban transformation. We are presenting next-generation products by having high quality standards and understanding sector demands. Therefore, we are the first company that comes to the mind of our customers in the construction sector with our high storage capacity and efficient logistic network.

- **Retarder**
- **Anti-Foam Agents**
- **Pigment and Filling Raw Materials**
- **Ceramic and Glass Raw Materials**
- **Concrete and Cement Additives**
- **Paint Raw Materials**

Retarder

Citric Acid Anhydrate
Citric Acid Monohydrate L (+)
Natural Tartaric Acid

Anti-Foam Agents

Powder Anti-Foams
Liquid Anti-Foams

Pigment and Filling Raw Materials

Titanium Dioxide Anatase
Titanium Dioxide Rutile

Ceramic and Glass Raw Materials

Barium Carbonate
Potassium Carbonate
Sodium Carbonate
Heavy Soda Ash
Sodium Nitrate
Sodium Tripolyphosphate (STPP - Powder)
Sodium Tripolyphosphate (STPP - Granule)

Concrete and Cement Additives

Sodium Gluconate
TIPA (Triisopropanolamine)
Tri Ethanol Amine (TEA)
Naphthalene Sulphonate
Mono Ethylene Glycol (MEG)
Sodium Ligno Sulfonate

Paint Raw Materials

Sodium Hexametaphosphate
Castor Oil
Distillate Coco Fatty Acid
Soya Lecithin
Potassium Carbonate
Ammonium Persulphate
Potassium Persulphate
Sodium Persulphate
Dimethylformamide
Polyvinyl Alcohol (PVA)
Acetone
IPA
Nitric Acid
Butyl Glycol
Butyl Diglycol
Dipropylene Glycol (DPG)
